

Humidity standards

Equipped with Rotronic humidity standards, a suitable calibration device and the HW5 software, it is easy to calibrate and adjust probes on-site at your premises. It is also possible to calibrate and adjust probes with the handheld instrument HP32 (direct adjustment with the device, no software needed).

APPLICATIONS

Calibration and adjustment of Rotronic probes (third-party probes also possible).

FEATURES

- Traceable to national standard
- Ampoules contain unsaturated salt solutions
- Inexpensive calibration on site
- Simple and safe use
- Unlimited lifetime as long as the glass ampoules are kept sealed
- Practical packs of 5 ampoules of the same humidity value (approx. 0.8 ml per ampoule)

Order code	Nominal value	Measurement uncertainty at 23 °C	Quantity	PADS Included
EA00-SCS	0,5 %rh	±0.3 %rh	5	5

Compatible

- With all calibration devices

Delivery package

- SCS certificate
- Textile pads
- Calibration instructions

Recommended accessories

- Textile pads in tubes (50 pc.) EA-PADS
