ISO 3310-1***

*for 200, 250, 300 & 315mm,
8 & 12 inch diameter sieves
to EN 932-5, ISO 3310-1 -
test*

Code SV005
Tariff 847410 00 0

()

This Sieve Shaker uses electromagnetic impulses to impart a triple vibrating action.

- ▶ Vertical
- ▶ Lateral
- ▶ Rotational

The shaker is of a simple and sturdy construction making it ideal for continuous and intense use. It is operated and controlled via a separate control panel enabling high precision, performance and repeatability. This unit will accept 200, 250, 300 and 315mm, 8 and 12inch diameter sieves.

The shaker can hold up to 10 sieves. It is fitted with a digital 1 to 999 minute timer, accessed through the digital control panel. This separate panel also gives the user control of the vibration intensity and pauses between sieving actions, which is particularly useful when sieving fine materials.

Wet sieving kits in the appropriate sizes may be used with this shaker.
